Server frameworks (SpringBoot)
- **Databases** : Relational Databases (MySQL, MongoDB)  
Query languages ( SQL)
- **Web Servers/Deployment** : Cloud platforms ( AWS, VERCEL)
- **Operating System** : Microsoft Windows, Google's Android OS, Linux

## Projects:

### Project Title:Hotel Booking System

The project Hotel Booking System is a web-based application that allows the hotel manager to handle all hotel activities online, Interactive GUI and the ability to manage various hotel bookings and rooms make this system very flexible and convenient.

### Project Title: Real-Time Crypto Tracker

The Real-Time Crypto Tracker is a web application built using ReactJS that allows users to monitor and track real-time information about various cryptocurrencies. The application provides a user-friendly interface to view live prices, historical data, and key statistics for a wide range of cryptocurrencies.

### Project Title: Prediction

An age and country prediction project uses machine learning to estimate a person's age and nationality based on their name. By analyzing patterns in a large dataset of names, the system provides probable age ranges and country origins, aiding in demographic research, marketing strategies, and personalized user experiences.
